Report on Remedial Classes for B.Sc. 5th Semester

Our teaching staff took remedial classes for slow learners after short listing them. The criteria for selection are the poor internal marks scored. Around 40 students actively participated in the classes conducted and appreciated the effort of the teachers. They have improved their scores in the final examination. The details of classes taken is given below.

Date	Time	Topic	Faculty
5/01/2022	1PM to 2PM	Rectifiers	Dr. T. R. Arvinda
6/01/2022	1PM to 2PM	Bohr atom model	K. Ajith Narayana Rao
7/01/2022	1PM to 2PM	Vector atom model	Dr. M. Prabhugouda

The selection of topics is based on the students demand

Bohr's Model of Atom

- 1- Electrons revolve around the nucleus in definite energy levels called orbits or shells in an atom without radiating energy.
- 2- As long as an electron remains in a shell it never gains or loses energy.

Full Wave Rectifier

Full-wave rectifier circuits are used for producing an output voltage or output current which is purely DC. The main advantage of a full-wave rectifier over half-wave rectifier is that such as the average output voltage is higher in full-wave rectifier than in half-wave rectifier.
